

IMPORTANT SAFETY INFORMATION - LEAVE THIS INFORMATION FOR OCCUPANT

Window Opening Control Device for MI Series (Single-Hand) Window

This window has a factory-installed window opening control device (W !D) designed to restrict the window opening to prevent accidental falls by children. Please review this safety information as it is important to understand the operation and maintenance of this device.

When a W !D is properly installed and engaged, no space shall exist at the lowest opening portion of the window that would permit the passage of a rigid sphere (2 inches in diameter). Please follow these instructions to avoid the W !D being ineffective in controlling the window opening and resulting in accidental falls.
